

Component	Quantity	Function	Column 1	Column 2	Column 3	Column 4	Column 5
EV3 L Motor	1	Serves as the main driving motor for the robot, creates a lot of torque					
EV3 M Motor	1	Serves as our turning motor, very fast					
EV3 Hub	1	Is the brain, i don't have to explain this one					
EV3 Battery	1	A rechargeable 2050mAh lithium-ion battery, take quite some time to charge but also quite some time to die					
EV3 Infrared Sensor	3	3 sensors dictate the robots main logic and allow it to avoid certain things within a radius around it to it's right left and center					
EV3 color sensors	1	Tells colors, red and green are colors					
Pixicam camera	1	Camera, kind bad for photos but it gives the robot eyes
